RELEVANT EXPERIENCE

ALLEGIANCE

- Built React / Redux application that served as a social platform for sports fans.
- Worked with a group of developers in an Agile environment to meet the expectations of a stakeholder within a limited timeframe.
- Integrated the Socket.io framework to enable real-time, bidirectional and event-based communication.
- Implemented group features such as private groups, admin users, and in-app invites.

TREASURE HUNTER

- Built React application that utilizes a pre-existing api to traverse a map and play a game.
- Integrated a python script with an algorithm that utilizes a breadth-first search to complete the game objectives while adhering to the rules.
- Successfully mined a Lambda Coin by submitting a valid proof for the blockchain.

LEARN LOCKER

- React / Redux application that serves as a social and educational platform for software developers.
- Reformatted an existing codebase to use styled components.
- Implemented a "lock" feature which pins or saves posts to the user's "locker"

SKILLS

- HTML
- CSS
- Javascript
- React + Redux
- Node.js + Express
- SQL
- Github
- Agile
- Python
- Data Structures
- Algorithms

EDUCATION

Lambda School
MAY 2019 - PRESENT
Software Development Program.

Curriculum: Full Stack Javascript and Computer Science

The University of Kansas
AUGUST 2012 - PRESENT
Working towards a Bachelors Degree in Exercise Science with an emphasis on Physical Therapy.
